Dear colleagues!

We invite you to participate in The VII International Scientific and Technical Conference "THE SOLUTION OF ENVIRONMENTAL PROBLEMS IN THE CONSTRUCTION INDUSTRY AND REAL ESTATE" will be held on **November 18th - 19th, 2017** in Ho Chi Minh City (Vietnam). The conference is co-organized by the Moscow State University of Civil Engineering (MGSU - Russia) and the University of Architecture Ho Chi Minh City (UAH - Vietnam).

The conference topics address a wide range of issues related to environmental sustainability and safety, energy and resource saving in the construction and management of real estate, as well as the impact of the environment on climate change. Within the framework of the conference, the following sections will be organized:

Session 1: Sustainable development of cities and territories. Energy-resource-saving, ecological aspects of construction;

Session 2: The role of architecture in development of the built environments: historical lessons and future challenges;

Session 3: Ecological and economic aspects of sustainability and justification of effective solutions in construction, urban development and real estate;

Session 4: Environmental safety of social, transport and engineering infrastructures.

Leading scientists and practitioners from more than 25 countries are invited to participate in the conference. If you have attention to any of these above topics, we would like to invite you to participate in our conference.

Papers are accepted in English language and design, appropriate to the traditions of English-language scientific publications. The manuscript should follow the format in the conference website: <http://repvssin.org/manuscript-format/>.

Every submitted paper will be carefully reviewed by members of the International Scientific Committee. All accepted papers will be included in the conference proceedings and published with ISBN number. Some selected papers will be recommended to peer-reviewed and published in international journals indexed in SCOPUS.
